

The following are keys for the Estuarium Curriculum. Please familiarize yourself with them, but remember that you are there to assist and guide students, but not to give the students the answers. The questions are divided by gallery, students can find panels and tanks that will assist them in completing their worksheets in the respective galleries.

Also you will find that many of these answers will vary depending on which animals are in the tanks. Many of the questions depend on student observations of animals in the tanks and require students to interpret those observations. Encourage students to make these observations so that they get the most out of their experience at the Estuarium.

Thank you for all of your help in making this an exciting and educational experience for all!
