

Build-a-Drifter

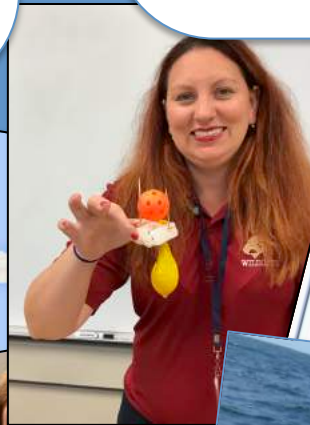

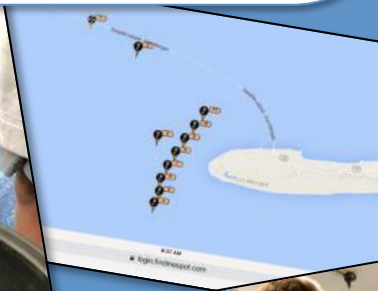

A workshop for
classroom teachers

Discovery Hall Programs
Education and Outreach

Jan. 28, 2019
8:30-2:30

Drifters are devices that track water currents. They can be constructed from simple and inexpensive materials, launched in local waters and followed through a phone app using GPS tracking.

Join the Sea Lab team for this STEM workshop to explore drifters, their construction, deployment, and applications; and to explore using drifters to track trash through watersheds.

We'll build model drifters, explore a series of lesson plans focused on drifters, watersheds, and the problem of debris in local waters; and discuss opportunities for students to work with DISL on a drifter deployment in Mobile Bay.

When: January 28; 8:30-2:30 (lunch provided)

Where: Environmental Studies Center, Mobile

Cost: FREE, \$50 stipend

To register:

Go to <https://www.disl.org/dhp/build-a-drifter-workshop> and click on the registration link at the top of the page. \$25 registration fee, refundable upon completion of the workshop

Questions: Contact DHPWorkshops@disl.org or 251-861-2141 x7515 with any questions.
